

Becoming an Investigator

The advancement of medicine relies on dedicated clinical trial partners. If you are interested in working with Pfizer as an investigator, please send your contact details, institution or site name, and therapeutic areas of interest to clinicaltrials@pfizer.com

Investigator Responsibilities

 Protocol compliance	 Communication with the IRB/IEC
 Participant safety	 Timely completion of CRF documentation
 Informed consent	 Communication with other facilities of the study site, such as laboratory and pharmacy
 Investigational product (IP) handling/accountability	 Confidentiality requirements
 Staff training and oversight	 Resourcing

There are many roles involved in clinical trial duties and functions
